<b>Preface</b> .....	<b>xv</b>
<b>Introduction</b> .....	<b>xvii</b>
<b>Chapter 1: The Clockwork Universe</b> .....	<b>1</b>
1.1 Weather or not .....	2
1.2 About this chapter .....	3
1.3 The mechanistic worldview .....	4
1.4 Crisis management and mechanistic change .....	8
1.5 Behavioral change management .....	11
1.6 Cracks in the clockwork .....	14
1.6.1 Inability to predict the results of our changes .....	15
1.6.2 Teflon change .....	15
1.6.3 Non-repeatability of results .....	16
1.6.4 Old organizational structures .....	16
1.6.5 Complexity of change .....	16
1.6.6 The cure can be worse than the disease .....	17
1.6.7 The wall of measurability .....	17
1.6.8 Chickens and eggs .....	18
1.7 Summary .....	19
1.8 Where to go from here .....	20
1.9 Suggested further reading .....	20
<b>Chapter 2: A New Worldview</b> .....	<b>21</b>
2.1 A crisis of perception .....	22
2.2 About this chapter .....	23
2.3 The systems worldview .....	24
2.3.1 The systems view .....	24
2.3.2 Living systems .....	27
2.4 Need for deeper understanding .....	40
2.4.1 Building the perfect machine .....	41
2.4.2 The cost of the machine .....	43
2.4.3 A different path .....	43
2.5 Summary .....	46
2.6 Where to go from here .....	48
2.7 Suggested further reading .....	49

<b>Chapter 3: The Systems Thinking Language</b> .....	<b>51</b>
<b>3.1</b> Learning the language of the systems thinker .....	52
<b>3.2</b> About this chapter .....	54
<b>3.3</b> Why create causal loop diagrams? .....	56
3.3.1 Causal loop diagramming helps us uncover our tacit mental models of how systems operate .....	57
3.3.2 Causal loop diagramming helps us see dynamic complexity .....	58
3.3.3 Causal loop diagramming helps us uncover “fuzzy” dynamics of a current situation .....	58
3.3.4 Causal loop diagramming helps us examine chronic, recurring problems from a systems point of view .....	59
3.3.5 Causal loop diagramming helps us build quality computer-based models, simulators, and learning laboratories .....	60
3.3.6 Causal loop diagramming helps us identify where and how we can best change system behavior .....	60
<b>3.4</b> Causal loop: the sentence construct .....	61
3.4.1 Domino thinking .....	62
3.4.2 Causal loop thinking .....	64
<b>3.5</b> Guidelines for naming and relating variables .....	67
3.5.1 Give variables names that indicate what is quantifiable .....	68
3.5.2 Select variables that change over time .....	68
3.5.3 Name variables as nouns .....	69
3.5.4 Note whether the cause variable as a “same” and “opposite” relationships with the effect variable .....	69
3.5.5 Use positive or neutral language when naming variables .....	71
3.5.6 Use intermediate variables to clarify uncertain relationships .....	72
3.5.7 Use “thought bubbles” to improve the meaning of relationships .....	74
3.5.8 Identify both positive and negative effects between variables .....	75
<b>3.6</b> Summary .....	77
<b>3.7</b> Where to go from here .....	78
<b>3.8</b> Suggested further reading .....	78

<b>Chapter 4: Causal Loops</b> .....	<b>79</b>
4.1 The building blocks of systems thinking .....	80
4.2 About this chapter .....	80
4.3 Balancing loops – stability and self-regulation .....	81
4.3.1 Work intensity dynamic .....	85
4.3.2 Staff level dynamic .....	86
4.4 Reinforcing loops – growth and decline .....	87
4.4.1 Company caste system .....	89
4.4.2 Software crisis .....	90
4.4.3 Relating work intensity to software errors .....	91
4.4.4 Delivering software .....	93
4.4.5 Theory X and Theory Y .....	94
4.5 Delays, delays, delays .....	98
4.5.1 Delays cause people to over-reacting to observed conditions .....	99
4.5.2 People act as if data is current .....	102
4.5.3 Delays inhibit learning .....	103
4.6 Combining loops to create greater meaning .....	104
4.6.1 Balancing project schedules and costs .....	105
4.6.2 Project commitment process .....	107
4.7 Summary .....	115
4.8 Where to go from here .....	116
4.9 Suggested further reading .....	116
<b>Chapter 5: A New Look at the Classic Stories in Software Engineering</b> .....	<b>117</b>
5.1 Natural laws of a system .....	118
5.1.1 All systems have natural laws .....	119
5.1.2 Natural laws establish the consequences of our actions .....	119
5.1.3 Natural laws are inviolate .....	119
5.1.4 We can delay the consequences of a system’s natural laws, but not forever .....	119
5.1.5 Our limited understanding of system dynamics inhibits our ability to discover the natural laws that are in effect .....	120
5.1.6 Delays inhibit learning .....	120
5.2 About this chapter .....	121
5.3 Drifting Goals archetype .....	122
5.3.1 Structure .....	122
5.3.2 Behavior over time .....	124
5.3.3 Examples in software engineering .....	125

5.3.4	Strategies for resolving situations created by this archetype .....	129
<b>5.4</b>	<b>Fixes that Fail archetype .....</b>	<b>131</b>
5.4.1	Structure .....	131
5.4.2	Behavior over time .....	132
5.4.3	Examples in software engineering .....	133
5.4.4	Strategies for resolving situations created by this archetype .....	136
<b>5.5</b>	<b>Shifting the Burden archetype .....</b>	<b>138</b>
5.5.1	Structure .....	139
5.5.2	Behavior over time .....	140
5.5.3	Examples in software engineering .....	141
5.5.4	Strategies for resolving situations created by this archetype .....	144
<b>5.6</b>	<b>Success to the Successful archetype – Pygmalion at work .....</b>	<b>145</b>
5.6.1	Structure .....	146
5.6.2	Behavior over time .....	147
5.6.3	Examples in software engineering .....	148
5.6.4	Strategies for resolving situations created by this archetype .....	151
<b>5.7</b>	<b>Limits to Growth archetype .....</b>	<b>152</b>
5.7.1	Structure .....	153
5.7.2	Behavior over time .....	153
5.7.3	Examples in software engineering .....	154
5.7.4	Strategies for resolving situations created by this archetype .....	159
<b>5.8</b>	<b>Summary .....</b>	<b>160</b>
<b>5.9</b>	<b>Where to go from here .....</b>	<b>161</b>
<b>5.10</b>	<b>Suggested further reading .....</b>	<b>163</b>
<b>Chapter 6: Constructing Causal Loop Diagrams (CLDs) to Learn About Current Situations .....</b>		<b>165</b>
<b>6.1</b>	The traditional software development landscape .....	166
<b>6.2</b>	About this chapter .....	167
<b>6.3</b>	Requirements for a diagramming method .....	168
<b>6.4</b>	The diagramming process .....	169
6.4.1	Phase 1: Understand the situation .....	171
6.4.2	Phase 2: Create a BOT graph .....	174
6.4.3	Phase 3: Diagram .....	178
6.4.4	Phase 4: Check results .....	180
<b>6.5</b>	Example scenario .....	181
6.5.1	Iteration 1: The production process .....	181

6.5.2	Iteration 2: Effects of defects on the production process .....	194
6.5.3	Iteration 3: Introduction of process improvement .....	201
<b>6.6</b>	<b>Diagramming dos and don'ts .....</b>	<b>208</b>
<b>6.7</b>	<b>Summary .....</b>	<b>210</b>
<b>6.8</b>	<b>Where to go from here .....</b>	<b>211</b>
<b>6.9</b>	<b>Suggested further reading .....</b>	<b>211</b>
<b>Chapter 7: Using Causal Loop Diagrams (CLDs) for Intervention .....</b>		<b>213</b>
7.1	The whole picture .....	214
7.2	About this chapter .....	215
7.3	Systems-based intervention strategies .....	216
7.3.1	Break links .....	217
7.3.2	Add links .....	218
7.3.3	Shorten delays .....	219
7.3.4	Reverse vicious cycles .....	220
7.3.5	Alter policies .....	221
7.4	Modifications to the diagramming process .....	222
7.4.1	Phase 1: Understand the situation .....	222
7.4.2	Phase 2: Create a BOT graph .....	224
7.4.3	Phase 3: Intervene .....	226
7.4.4	Phase 4: Check results .....	229
7.5	Example scenario .....	230
7.5.1	Iterations 1 and 2: Diagramming the System ....	231
7.5.2	Iteration 3: The Intervention .....	242
7.6	Intervention dos and don'ts .....	253
7.7	Summary .....	255
7.8	Where to go from here .....	257
7.9	Suggested further reading .....	258
<b>Appendix A – Diagramming Method Process .....</b>		<b>259</b>
<b>References .....</b>		<b>265</b>
<b>Index .....</b>		<b>271</b>
<b>Variables Used .....</b>		<b>281</b>

# Figures

---

## Chapter 1: The Clockwork Universe

Figure 1.1:	Arnaldo Pomodoro's "Spheres within Sphere" at Trinity College, Dublin .....	6
Figure 1.2:	Event-based problem-solution focus .....	9
Figure 1.3:	Patterns of behavior-based problem-solution focus .....	12

## Chapter 2: A New Worldview

Figure 2.1:	Systems-based problem-solution focus .....	26
Figure 2.2:	Nonlinear relationship of schedule pressure to productivity .....	34

## Chapter 3: The Systems Thinking Language

Figure 3.1:	Living system dynamics .....	56
Figure 3.2:	Domino thinking's "chain" of events .....	62
Figure 3.3:	Cause-and-effect diagram example .....	64
Figure 3.4:	Simple causal loop .....	65
Figure 3.5:	Completing a feedback loop in the fishbone diagram example .....	66
Figure 3.6:	Production level problem in causal loop structure .....	67
Figure 3.7:	Two kinds of relationships .....	70
Figure 3.8:	Linear and nonlinear "Same" relationships between variables .....	70
Figure 3.9:	Linear and nonlinear "Opposite" relationships between variables .....	71
Figure 3.10:	Negative naming .....	71
Figure 3.11:	Positive naming .....	72
Figure 3.12:	Work intensity affects on productivity (1) .....	73
Figure 3.13:	Work intensity affects on productivity (2) .....	73
Figure 3.14:	Work intensity affects on productivity (3) .....	73
Figure 3.15:	Two kinds of relationships with thought bubbles.....	75
Figure 3.16:	Work intensity having both positive and negative effects on productivity .....	76

Figure 3.17:	How staffing level have positive and negative effects on productivity .....	76
--------------	---	----

#### **Chapter 4: Causal Loops**

Figure 4.1:	Template and BOT graph for a balancing loop.....	83
Figure 4.2:	Furnace thermostat control .....	83
Figure 4.3:	Meeting a project schedule by adjusting work intensity.....	85
Figure 4.4:	Meeting a project schedule by adding more staff .....	86
Figure 4.5:	Template and BOT graph for a reinforcing loop.....	88
Figure 4.6:	Population growth.....	89
Figure 4.7:	Company caste system .....	90
Figure 4.8:	Will the software crisis ever end? .....	91
Figure 4.9:	Effects of work intensity on software defects.....	92
Figure 4.10:	Knowing when to deliver the software.....	94
Figure 4.11:	Theory X and Theory Y .....	95
Figure 4.12:	Simulating delays in a drunk driver steering a vehicle .....	100
Figure 4.13:	Delays in meeting a project deadline by adding staff.....	101
Figure 4.14:	Balancing project cost and schedule drivers.....	106
Figure 4.15:	Domino commitment process.....	108
Figure 4.16:	Project commitment cycle .....	109
Figure 4.17:	Achieving project goals .....	110
Figure 4.18:	Project commitment process .....	111

#### **Chapter 5: A New Look at the Classic Stories in Software Engineering**

Figure 5.1:	Drifting Goals archetype structure.....	123
Figure 5.2:	BOT graph for the Drifting Goals archetype.....	124
Figure 5.3:	Eroding process adherence .....	126
Figure 5.4:	Drifting software quality goals .....	128
Figure 5.5:	Fixes that Fail archetype structure .....	132

Figure 5.6:	BOT graph for the Fixes that Fail archetype.....	132
Figure 5.7:	Adding staff to a late project.....	134
Figure 5.8:	The unreasonable schedule.....	135
Figure 5.9:	Legacy software systems.....	136
Figure 5.10:	Shifting the Burden archetype structure.....	140
Figure 5.11:	BOT graph for Shifting the Burden archetype.....	141
Figure 5.12:	Addiction to heroics.....	142
Figure 5.13:	Pressure to produce.....	143
Figure 5.14:	Success to the Successful archetype structure.....	147
Figure 5.15:	BOT graph for the Success to the Successful archetype.....	148
Figure 5.16:	Product development versus process improvement.....	149
Figure 5.17:	Starving product lines.....	151
Figure 5.18:	Limits to Growth archetype structure.....	153
Figure 5.19:	BOT graph for the Limits to Growth archetype.....	154
Figure 5.20:	Search for defects.....	155
Figure 5.21:	Development resource constraint.....	156
Figure 5.22:	Process improvement paradox.....	158

## **Chapter 6: Constructing Causal Loop Diagrams (CLDs) to Learn About Current Situations**

Figure 6.1:	The four phases to evolving a causal loop diagram.....	171
Figure 6.2:	Example Behavior over Time (BOT) graph.....	177
Figure 6.3:	Scope document.....	183
Figure 6.4:	BOT graph #1 for the CAMBER project.....	187
Figure 6.5:	Senior management's mental model.....	188
Figure 6.6:	Profitability growth cycle.....	189
Figure 6.7:	Limits to profitability growth.....	192
Figure 6.8:	BOT graph #2.....	196
Figure 6.9:	Defects inhibit production growth.....	197
Figure 6.10:	Defect growth cycles.....	199
Figure 6.11:	BOT graph #3.....	203
Figure 6.12:	Process improvement effect on production growth.....	204

Figure 6.13:	Process improvement effect on defect reduction.....	205
Figure 6.14:	Limits to process improvement.....	207

## **Chapter 7: Using Causal Loop Diagrams (CLDs) for Intervention**

Figure 7.1:	Views of a situation .....	215
Figure 7.2:	Effects of pressure to be productive on sound engineering practices .....	220
Figure 7.3:	Scope document .....	232
Figure 7.4:	Initial BOT graph for the GoDB program .....	235
Figure 7.5:	Linking key variables .....	236
Figure 7.6:	R1 - Ballooning system-level test time .....	237
Figure 7.7:	R2 - Eroding time to fix defects .....	238
Figure 7.8:	R3 - Eroding confidence in product quality .....	239
Figure 7.9:	B1 and B2 - Pressure release valves .....	240
Figure 7.10:	R4 - Backfire on the pressure release valves .....	241
Figure 7.11:	GoDB program interface diagram .....	243
Figure 7.12:	Revised BOT graph with projected trends.....	245
Figure 7.13:	Desired dynamic structure.....	251

# Tables
